

# EXAMINATION NOTEBOOK

---

For the examiner who thinks with ink.

# A note about the record

This notebook gives working thought a physical place. It does not place that thought outside policy, discovery, retention, or the official case record.

BEFORE THIS NOTEBOOK ENTERS THE BENCH

- Confirm whether handwritten notes become agency records.
- Use approved case identifiers and handling practices.
- Do not record credentials or restricted data contrary to policy.
- Store, disclose, retain, and dispose of the notebook correctly.

| ITEM | SOURCE / DEVICE | IDENTIFIER | ACQUISITION | HASH REF |
|------|-----------------|------------|-------------|----------|
| 01   |                 |            |             |          |
| 02   |                 |            |             |          |
| 03   |                 |            |             |          |
| 04   |                 |            |             |          |
| 05   |                 |            |             |          |
| 06   |                 |            |             |          |
| 07   |                 |            |             |          |
| 08   |                 |            |             |          |

# Tools and version references

Record enough detail to reconnect a note or observation to the process that produced it.

| TOOL / METHOD | VERSION / BUILD | PURPOSE / OUTPUT REFERENCE |
|---------------|-----------------|----------------------------|
|               |                 |                            |
|               |                 |                            |
|               |                 |                            |
|               |                 |                            |
|               |                 |                            |
|               |                 |                            |
|               |                 |                            |
|               |                 |                            |
|               |                 |                            |
